## COMPACT FORM FACTOR

The Woodway Vive's compact design maximizes space efficiency without compromising performance or durability. Perfect for commercial gyms, boutique studios, multi-residential buildings, and home gyms, it delivers the full Woodway experience in a space-saving package. Its efficient design allows facilities to optimize space while maintaining equipment quality and user experience, offering premium features in a smaller footprint.

## QUICKSET MINI DISPLAY

The Quickset Mini display offers streamlined functionality in a compact form. It provides one-touch access to frequently used speeds and inclines, with minimal touches for minor adjustments. This design maintains ease of use while reducing the treadmill's overall height. The smart layout ensures clear visibility for users following instructor-led sessions or viewing wall-mounted displays, without compromising access to performance data.

## ORIGINAL SLAT BELT

Woodway pioneered treadmill innovation with its patented slat belt design. This technology offers superior comfort and durability, reducing impact and mimicking natural terrain. The unique construction maximizes performance and longevity, making Woodway a top choice for athletes, fitness enthusiasts, and medical professionals globally.
